Jim,

I thought you and Kevin would give me your available schedules for this week and next so I can get HQ on the line with you. I'm wondering if you're waiting on Bryan Rittenhouse's number?

Bryan Rittenhouse
202-564-0577

Region 2 would like to be involved in the call so that we don't get your conversation with Bryan second hand.

Thanks,

Steve

Steve,
Thanks for getting back to us with the salt pile info. As I noted, I would like to have my permit writer and manager available for discussion on this issue. I checked our schedules, and we are available for a conference call at the following times:

- Thursday 10/31 at 11 am
- Monday 11/4 at 11 am, or anytime in the afternoon
- Tuesday 11/5 at 11 am
- Wednesday 11/6 at 3:30 pm

Let us know what works for you. Thanks.

Jim

Attachments: 104021L03 (2).pdf

Steve – Can you please set something up with Connie and Brian on the NJ salt pile issue for this week? It's been 2 and a half months since our meeting with Triton, Kinder Morgan, Sims, etc. and we need to close the loop on this asap. Please make sure to frame the issue for them and the question for which we'd like clarity/national consistency.

You might also want to check in with DEP if they've done anything since our meeting since that was some time ago. My recollection was that they were waiting to hear from us.

Thanks,
Michelle

Subject: RE: Attendees of the Salt Pile Meeting

Thanks, Steve. Where are we on follow-up from the meeting? If I remember correctly, we were going to provide NJ DEP with the official interpretation of our regs from OW so they could continue to nail down the appropriate permit conditions for this sector?

Subject: Port Newark Salt Piles

Steve,

We were wondering if any progress has been made in regards to reaching out to EPA's Headquarters to decide if the dilution of runoff from these piles to meet potential effluent limitations or benchmarks is permissible. As you aware, many of us at the NDJEP are concerned with the proposal offered by Triton Environmental and its potential impacts on other industries we regulate. If you need any additional information, please contact me. Thank you.

Subject: EPA contact

Steve,

At our last meeting, I discussed some concerns we were having w/ a ship repair company that's located in Bayonne NJ, and it's sister company at the Brooklyn Navy Yard (GMD). I'm looking through some old correspondence but cannot locate the girls' name who was your enforcement officer present at the meeting. Can you give me her name? We're drafting a new permit for the NJ company and want to see if she could shed any insight in comparison to what she may have encountered at the GMD yard. Sorry to bother you w/ something trivial.

Salt pile permit's going out in the next DEP Bulletin by the way.

Steve,

The salt companies have representation inquiring about the status of the permit. I'd like to hear from your group before issuing. If you want to discuss, you can give me a call directly at 609-984-3711, or I can set up a conference call w/ Brian McLendon/Jim Murphy if you want. Either way, let me know, thanks.

Steve,

I'm around all morning, I'm easy to reach. Jim/Brian are a little harder. I know they have meetings in the afternoon- looks like Brian (my supervisor) may be around after 3. I'm not sure about Jim Murphy (our Bureau Chief), I can't see his calendar and he's in a meeting now. Do you want to speak to all three of us at the same time, or would me and Brian suffice in case Jim can't make it?

Subject: RE: Salt Piles

James,

HQ and Region 2 had the conference call anyway and we came to the following conclusion.

In 40 CFR Part 122.2 (Definitions) you will find the definition of "Best management practices ("BMPs")." The definition states the following:

Best management practices ("BMPs") means schedules of activities, prohibitions of practices, maintenance procedures, and other management practices to prevent or reduce the pollution of "waters of the United States." BMPs also include treatment requirements, operating procedures, and practices to control plant site runoff, spillage or leaks, sludge or waste disposal, or drainage from raw material storage.

The key portion of the paragraph is "to prevent or reduce the pollution of "waters of the United States." Since the methods put forth by the permittees does not reduce the pollutant load generated by the facilities during a storm event, it therefore does not "prevent or reduce" pollution of the waters of the United States.

HQ's Water Permits Division/Municipal Branch staff and Region 2 CWRB agree that the permittees' proposed methods do not qualify as an acceptable BMP practice.

If you and Kevin wish to discuss this further, I would be glad to talk to you.

Subject: Port Newark Salt Piles

Steve,

We were wondering if any progress has been made in regards to reaching out to EPAs Headquarters to decide if the dilution of runoff from these piles to meet potential effluent limitations or benchmarks is permissible. As you aware, many of us at the NDJEP are concerned with the proposal offered by Triton Environmental and its potential impacts on other industries we regulate. If you need any additional information, please contact me. Thank you.

Jim,

I just got an e-mail from Chris Marchese stating that his firm wouldn't be able to make any meeting prior to my vacation of 7/15-7/22. So what I wrote in the prior message is half moot.

I still need to know what kind of lead time you need to get someone here or at the very least would a presence on the phone suffice?

Thanks,

Steve

Subject: RE: permitting of salt piles

Hi Steve,

We had a conversation with Steve Pico back on 6/18 (he's an attorney that represents the industry I believe), we let him know of our conversation about the salt piles (i.e. no commingling). I am assuming that Steve then spoke with Chris Marchese about the direction we are going. We have not yet spoken directly with Kinder-Morgan about the conversation we had with you. So...I assume they now know and are not happy about it. We certainly would like a presence at the meeting. When we did our site visit back in May, Chris seemed to believe that EPA Region 2 was on board with the "commingling" so I'm guessing he's not liking the answer and now wants an audience. Let me know when you're thinking of meeting and we can work something out for getting there (have to go through our travel office and get approval). Thanks for the heads up.

Chris,

August 7th at 10AM is fine.

The address is:

290 Broadway
New York, NY 10007-1866

You'll have to pass through security so be aware.

I'll have to nail down the room now but I'm shooting for the 24th floor where my cube is located.

DEP will be in attendance.

See you then.

Steve – it may be difficult to coordinate this before the 15th given the July 4th holiday and vacation schedules for all involved. I know some key players are on vacation during the week of July 8 and many will be out surrounding the 4th. If you are out the week of the 15th, it may need to be the week you return.

Subject: Bulk Salt Storage/NJ Storm water

Hi Steve – As discussed, I represent a number of firms operating bulk de-icing salt facilities located in Newark NJ including International Salt, Sims Metal Management, and Kinder Morgan. We would like to set up a meeting at your EPA office in New York to discuss the permitting process we have been working with NJDEP on over the past year or so. We understand that the DEP reached out to you for guidance on this matter and the initial feedback we received was concerning. We think such a meeting is important to discuss existing regulations and interpretations, existing and proposed BMPs, operations of bulk salt stock piles, and the industry in general before any final decisions are made on moving forward.

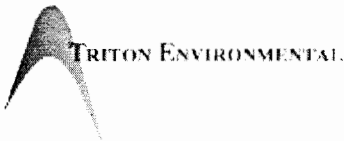

I understand that your Section Chief Michelle Josilo is out today, but will be back in tomorrow. Our preference is to schedule a physical meeting versus a conference call and recognize this is a busy time with summer vacations and the upcoming holiday. Possibly you can propose some available dates in the next few weeks.

Many thanks and I look forward to hearing from you.

Regards,

-C
